

Acrylic Pedestal Installation

Read the instructions below and follow all local plumbing and building codes.

Unpack and inspect your Tub and Pedestal for any shipping damages and ensure no pieces are missing.

If any damages are discovered, **DO NOT INSTALL**

Please contact customer service at 1(866)448-Tubs. You may also call our customer service for any other assistance with our products

Before installing it is suggested to have a blanket or soft surface to avoid scratches while the tub is turned upside down while attaching the pedestal.

TOOLS AND MATERIALS NEEDED :

17MM Socket Wrench | Blanket | Level

It is suggested to have atleast one partner in this installation

1. Begin by laying a blanket or soft cover on the ground and flipping the tub upside down onto the soft surface.

Once flipped, remove the plastic caps, nuts, and washers off of the bolts protruding from the bottom of the tub. Set these aside for later steps.

2. Unpack the pedestal and slip the bolts of the tub through the holes in each bracket of the pedestal.

3. Before tightening down the pedestal, ensure the crease around the tub is properly alligned.

If you notice any issues you can move the pedestal around on the tub (while keeping the bolts in the brackets) to find the correct positioning for the pedestal.

4. Once the position of the pedestal is correct, have your partner apply pressure to the pedestal and use the nuts and washers that were originally on the bolts of the tub to tighten the pedestal to the tub.

5. With the pedestal fully secured to the tub, adjust the levelers (Feet) of the pedestal to all be at the same height. Using a level here is suggested to garentee a level installation.

6. After adjusting the levelers (Feet) to the correct height, flip over the pedestal tub and use your level to double check the level of the tub. If adjustments need to be made, now is the time to flip the tub and make adjustments.

Repeat this step untill completely level to finish the installation.
